

# To set up, go to [air.bar/setup](http://air.bar/setup) or read this getting started guide.

1

Place the AirBar sensor right below the bottom edge of the display.

Marker

2

Use the white alignment markers to center AirBar.

3

Now, remove the two tags on the back.

4

Before attaching the AirBar sensor to your laptop, clean the bottom bezel from oil and dirt.

5

Attach AirBar to the bottom bezel and press gently above the magnet points.

6

Remove AirBar and press the magnets firmly to secure them. That's it - you are set up!

7

Now turn on your MacBook Air® notebook.

8

Attach AirBar and plug the USB connector into the notebook.

9

Done. You now have single finger touch.

Visit [www.air.bar/setup](http://www.air.bar/setup) to add support for multi-finger gestures.
